

SCOTIA GRENDEL PRODUCTIONS

Scotia News for August

Regeneration seems to be a good theme for this month's newsletter, as we drag ourselves back from the brink of hacker-related destruction of last month. So, in the spirit of regeneration, we've decided to re-release some old models that deserve some love.

Void 1.1

Junker players should have a smile on their faces as we offer up the very nice legion-specific Standard Bearers and Centurions. Available in Vulture, Serpent and Scorpion varieties, each of these models will affect the abilities of your army in a specific way.

Also available to download now, is the first issue of the old I-Kore magazine, Battles with Miniatures. Thanks to forum member Mark Nutter, and with the permission of Brigade Miniatures (owners of the Celts range), we can bring you all ten issues in pdf format. We'll bring out one issue each month or so, in order to keep an eye on our bandwidth usage (which spikes sharply every time we add a new downloadable item).

Generic Fantasy

Releases for the former Black Tree Legions of the Realm range continue, with more Corsair releases. We're aiming to bring out at least one release for this range each week. This week, the Corsairs are bolstered by troops armed with swords and shields. Probably best used during Errol Flynn inspired boarding actions, they look at home in the role of skirmish infantry on terra firma. Accompanying them is a command pack including Standard Bearer, Musician, and Champion.
